

Title	“Activate Personalisation” button acting as not responding
System information	
OS	Android 10
Testing App Version	TV_2_6_1
Device	Android Smart TV
Description	When personalisation is deactivated and the “activate personalisation” button on the most left is clicked, it does nothing. It would be more intuitive to give some information to the user what is happening. Ex. “Please login and active personalisation to be able to switch on personalisation mode” as a message to the user
Steps to reproduce the bug	1. Go to settings and deactivate personalisation 2. Just click the button multiple times
Expected Result	Some indication for unexperienced users that the app is working as intended
Actual Result	No response
Proof	
Severity/Priority	Minot
Impact [If known]	

Title	Enable to go back to initial menu from “Guest Mode” screen
System information	
OS	Android 10
Testing App Version	TV_2_6_1
Device	Android Smart TV
Description	Once entered the “Guest mode” I was unable to go to the previous step so I could activate “Group viewing” I have to exit “Guest mode so I could go to the previous menu step.
Steps to reproduce the bug	1. Go to settings and select “Guest mode” 2. Input any year and intensity 3. Activate “Guest mode” 4. Click back in the remote control so I can select “Group viewing” 5. I’m landing directly in video
Expected Result	Able to go back on the previous menu step and select “Group mode”
Actual Result	Going back directly to video/closing settings menu
Proof	Look at attached video Screen Recording 2021-06-16 at 12.12.26
Severity/Priority	Major
Impact [If known]	

Title	"Sound personalization" and "Intensity" option in "Guest mode" Settings are inactive
System information	
OS	Android 10
Testing App Version	TV_2_6_1
Device	Android Smart TV
Description	I click a little between different videos while paused, than tried to activate "Guest mode", which was not possible
